

A vibrant green parrot is shown in mid-flight, its wings spread wide. The parrot has a red beak and a thin red ring around its neck. It is positioned on the left side of the frame, facing left. A large, dynamic cloud of green particles, resembling dust or pollen, erupts from behind the parrot, trailing off towards the right. The background is a solid, deep black, which makes the green of the parrot and the particles stand out. The overall composition is energetic and visually striking.
